

PRODUCT OVERVIEW

Large Digital Display MK2 is a wall mounted temperature monitoring unit with alarm output. It shows reading on 100mm high, super-bright red, 3-digit display. Temperature measuring is being done with NTC sensor. Alarm output offers a pair of changeover volt-free contacts.

FEATURES

- NTC 10k temperature sensor input
- Polycarbonate enclosure IP65 rated
- Bright, 100mm high, 3-digit red display
- High temperature alarm output
- 0.1°C resolution

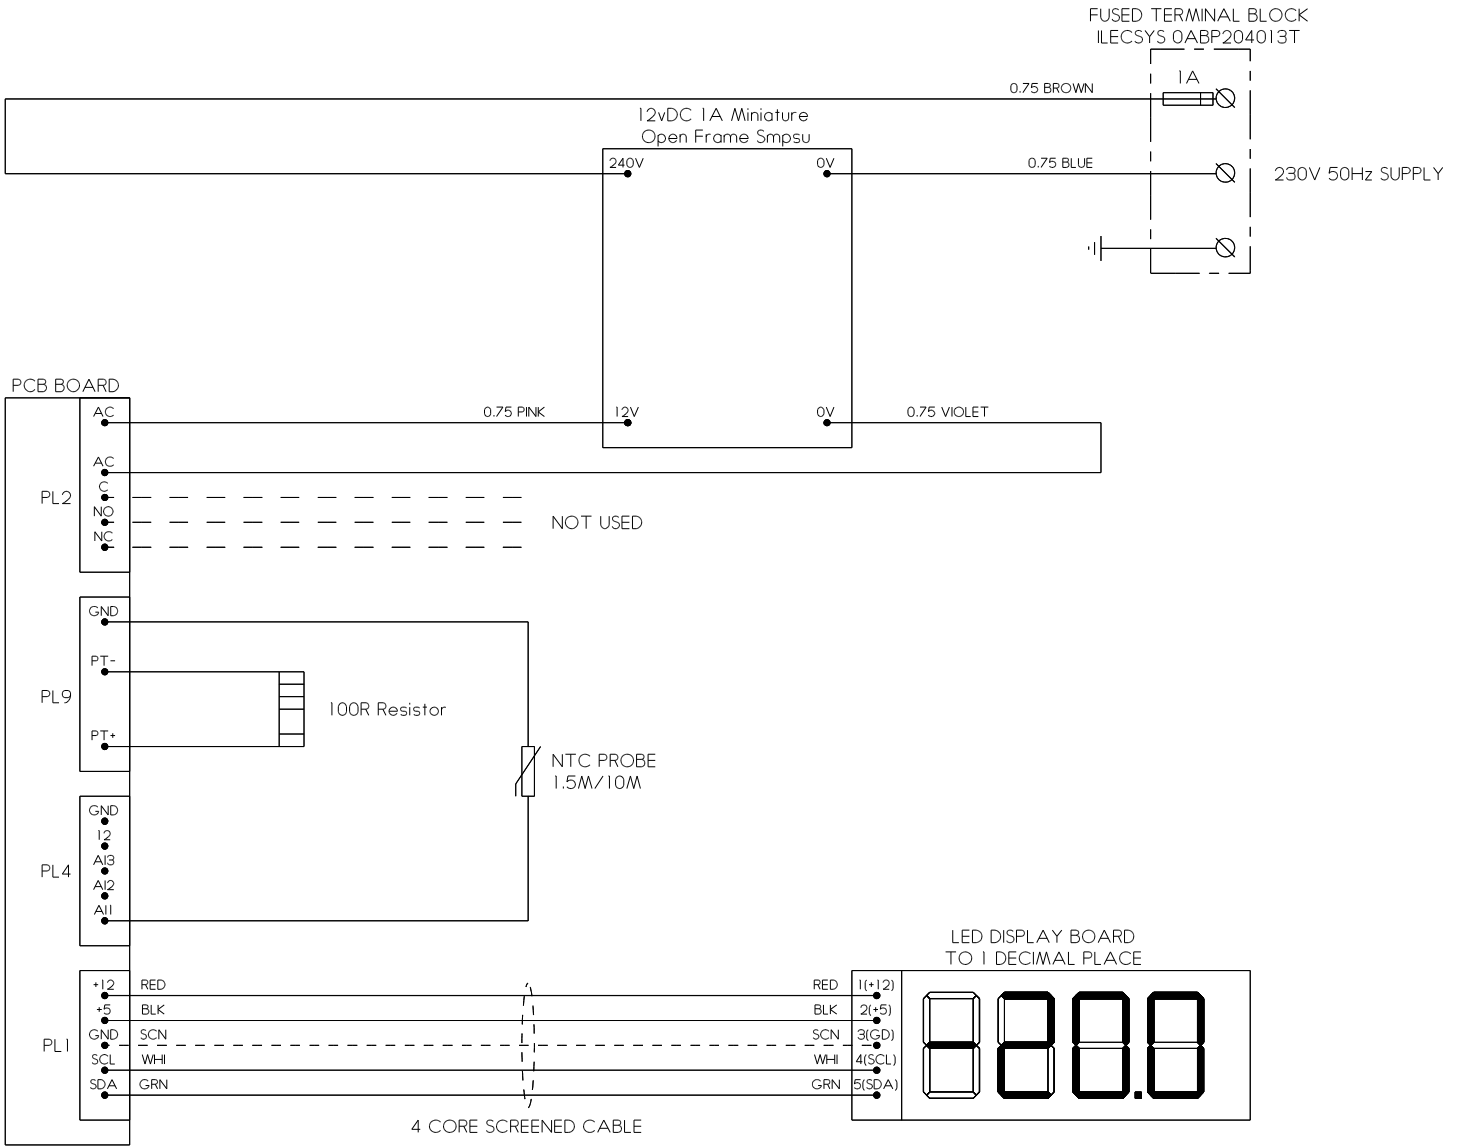

SPECIFICATION

Inputs:	NTC sensor input 4-20mA input
Outputs:	Alarm relay output with changeover contacts
Resolution:	0.1 or 0.5 °C
Power Supply:	230V AC
Consumption:	20VA Max.
Housing:	Polycarbonate enclosure
Protection Rating	IP65
Dimensions	200H x 400W x 132D mm
Operating Temperature:	-10 to 45 °C
Manufactured:	UK

SET UP

Setting high temperature alarm can be done by pressing SET switch. After holding button for 5 seconds temperature setpoint appears on the display, keep holding button down and now using onboard potentiometer adjust to desired value. For alarm delay, repeat whole procedure by holding TIME button.
